

Staying safe with money in a digital world – activity statement cards

Cut up statement cards to use for staying safe with money in a digital world activity.

I always keep my bank card PIN a secret.

I always log out from my laptop when I've finished using it.

I sometimes let my friends have my password for my social media account.

I'm not bothered about checking my privacy settings on my social media account.

I don't give out my personal information to anyone I don't know without checking who they are first.

The bank rang and asked me for my password, so I gave it to them.
